Why Salves Can't Cure Eczema

Since the old-fashioned theory of curing eczema through the blood has been given up by scientists, many different salves have been tried for skin diseases. But it has been found that these salves only clog the pores and cannot penetrate to the inner skin below the epidermis where the eczema germs are lodged. This—the quality of penetrating—probably explains the tremendous success of the well known liquid eczema remedy, out of wintergreen, thymol, glycerine, etc., as compounded in D.D.D. Prescription.

We have sold other remedies for skin

troubles but none that we can recommend as highly as this for we know that D.D.D. stops the itch at once. We just want you to give D.D.D. a trial. That will be enough to prove it. Of course all other druggists have D.D.D. Prescription—go to them if you can't come to us—but don't accept some big profit substitute. But if you come to our store, we are so certain of what D.D.D. will do for you that we offer you a full size bottle on this guarantee.—If you do not find that it takes away the itch AT ONCE, it costs you not a cent.
